Building Permit Requirements Checklist

After reading this document, please sign the last page and return it with the building permit application.

Retain a copy for your records.

It is required to **read and sign** this document for each Building Permit submitted.

This document contains information that will enable you to:

- Complete the Application for a Building Permit
- Documents required to accompany the Building Permit
- Information for inspections
- Information for Temporary Certificate of Occupancy and Certificate of Occupancy

Checklist of items to be returned with each Permit Packages:

- Building Permit Requirements form with **two** sets of plans and plot plan drawings.
- Application for Building Permit.
- Application for Water Permit for Spring Hill. (*not required for other water providers outside SH water district*)
- Application for Sewer Permit.

BUILDING PERMIT APPLICATION

NOTE: ALL contractors requesting building, plumbing, mechanical, and electrical permits **MUST** be licensed with the [Johnson County Contractor Licensing Program](#) or the [Miami County Contractor Program](#). Permits will not be processed without valid licensing.

Building permit packets are available at City Hall, 401 N. Madison St, or it can be viewed and downloaded from our website at www.springhillks.gov. Plans and forms are inspected within 10 days of submission. Permit costs are based on the following approximate costs:

- New Construction: The approximate cost of new 1 and /or 2 family dwelling is the selling price, minus lot cost, minus sewer cost, and minus water cost.
- Other construction is the value that is being added to the property.

All costs for Spring Hill utility connections and all other charges must be paid when the permit is issued except for the [deferred payment plan](#) for new home construction, which is part of the 2016 Economic Stimulus Program Resolution No. 2015-R-22.

All applications for building permits are subject to the following site plan requirements:

1. Submit plans prior to issuance of a permit. Plans will have been prepared in accordance with applicable City building codes.
2. Two sets of plans need to be submitted to the City. Scale should be 1/4 inch equals 1 foot. One set of plans will be returned to the builder. Plans need to include the following:
 - a) Four elevations.
 - b) Location of furnaces, hot water heaters, sump pumps, floor drains, size of beams, columns, footings, flue sizes and locations and types. Show sizes, spacing and lumber species to meet City codes.

- c) One-hour fire rating required between garages and living quarters.
- d) Exterior elevations will show materials to be used and approximate finished grades.
- e) Foundation plan will show footing sizes, height of concrete walls and special footings, such as for fireplaces, basement emergency escape and rescue window or exterior door.

3. The plot plan must include two fully dimensioned plot plans, showing walks, drives, patios, porches, retaining walls (if any), existing and final grades at corners of building and side property lines, upstream and downstream sewer top of manhole elevations and flow line elevations. Also show grades at each lot corner and curbs and grades of top of curbs at driveway and street juncture. Show the proposed elevation of each floor level and top and bottom of foundation wall. Provide direction arrows indicating how water will drain.

Remodeling and Additions, single-family residential. That part of the house that is to be remodeled and added to will require plans and inspections, as stated herein, that are acceptable.

Building Plans other than Single-Family and Duplex. No less than two sets of building plans will accompany the Building Permit Applications. The plans shall include structural, architectural, mechanical, electrical and plumbing. One set shall be filed with the City if approved and the other marked “approved” and returned to the Applicant. The plans shall be prepared, signed and sealed by a licensed Architect registered in the State of Kansas. The building inspection requirements will be the same as described in above site plan requirements.

Before any work may commence, all pertinent permits must be obtained.

BUILDING INSPECTION INFORMATION AND REQUIREMENTS

The contractor, builder and/or subcontractor are responsible to see that the following inspections are done before work is covered. The inspector will check “pass” or “fail” on a Report of Inspection Form that will be left on site. Upon completion of the structure, a final inspection will be done. When approved, a Certificate of Occupancy will be issued by a building inspector. No one is allowed to conduct a business or reside in a structure before this certificate is issued.

At least a 24 hour notice is required for ALL inspections. *Inspections are completed Monday through Friday between 8:00 a.m. and 4:00 p.m. To schedule an inspection, call the Community Development Department at (913) 592-3657 or in person at 401 N. Madison St., Spring Hill, KS 66083. Other calls or questions should be directed to the Chief Building Inspector.*

The City of Spring Hill, has adopted the following codes as a guideline to oversee the construction and building process:

- 2006 Edition, International Building Code
- 2006 Edition, International Residential Code
- 2006 Edition, International Plumbing Code
- 2006 Edition, International Fuel Gas Code
- 2006 Edition, International Mechanical Code
- 2006 Edition, International Property Maintenance Code
- 2006 Edition, International Fire Code
- 2005 Edition, National Electrical Code
- 2007 Spring Hill Zoning Ordinance

All inspections listed below must be done for new home construction, and some may apply to other projects:

Footing Inspection: When all excavation, forming and placement of reinforcing is complete and prior to pouring (*minimum 24 hour curing before placement of wall panels; 36" frost line*).

Foundation Walls Inspection: When all forming and placement of reinforcing is complete.

Ground Rough-in Inspection of Under Slab Plumbing: No sewer connection is to be made until the rough-in inspection is completed, and all vents, drains and cleanouts have been plugged or capped to prevent infiltration and it is observed that the roofing is completed at the rough-in framing stage. Concrete floors do not need to be inspected.

Building Sewer Connection: Prior to backfilling.

Driveway Approach: Install

City Sidewalk

Rough-in Framing, Rough-in Electrical, Rough-in Plumbing, Rough-in Mechanical: Prior to insulation and drywall work.

Gas Line Pressure Test: When the house gas piping is completed, and prior to ordering the meter, the piping is air pressure gauge tested at 10 lbs. p.s.i. After an inspection tag is applied the meter may be ordered.

Final Inspection: When the building is complete, a Certificate of Occupancy will be issued when all things are in order. A Temporary Certificate of Occupancy to complete planting sod and trees may be issued at a cost of \$75.00.

City of Spring Hill Water District Water Meter Installation and Water Main Tap: Inspections from the meter to the house are not required prior to backfilling. **Note:** A "Meter Set" work order for the Water Department is requested through City Hall as well. The installing contractor picks up and signs out meter installation materials and tapping tools on a first come first serve basis at the Public Works Building, 502 E. Nichols St., Spring Hill, KS 66083, Monday through Friday between 8 a.m. and 5 p.m. (with the exception of noon lunch hour). After installation is completed, please contact a representative from the Public Works Water Department at (913) 592-3317 for an inspection. Tools and spare materials are returned by the contractor to Public Works Building and signed in promptly upon completion. Failure to comply will result in tools not being loaned out to the offending contractor and the cost reimbursed to the City.

No one is allowed to conduct a business or reside in a structure before the Certificate of Occupancy is issued.

PERMIT EXPIRATION:

Every permit issued by the building official under the provisions of this code shall expire by limitation and become null and void if the building or work authorized by such permit is not commenced within 180 days from the date of such permit, or if the building or work authorized by such permit is suspended or abandoned at any time after the work is commenced for a period of 180 days. Before such work can be recommenced, a new permit shall be first obtained to do so, and the fee therefore shall be one half the amount required for a new permit for such work, provided no changes have been made or will be made in the original plans and specifications for such work; and provided further that such suspension or abandonment has not exceeded one year. In order to renew action on a permit after expiration, the permittee shall pay a new full permit fee. The expiration date of the permit will be determined by the building official, and an extension may be granted at the cost of \$100.00.

Any permittee holding an unexpired permit may apply for an extension of the time within which work may commence under that permit when the permittee is unable to commence work within the time required by this section for good and satisfactory reasons. The building official may extend the time for action by the permittee for a period not exceeding 180 days on written request by the permittee showing that circumstances beyond the control of the permittee have prevented action from being taken. No permit shall be extended more than once.

Suspension or Revocation. The building official may, in writing, suspend or revoke a permit issued under the provisions of this code whenever the permit is issued in error or on the basis of incorrect information supplied, or in violation of any ordinance or regulation or any of the provisions of this code.

I, _____, have read, understand and agree to the above rules and requirements.
